- Gained hands-on experience in embedded systems, XAMPP, SQL databases, and network troubleshooting.

PROJECTS

- **AI-Powered Smart Route Planning App (Flutter, AI, Google Maps API)** — Developed an AI-powered Flutter app with Google Maps API integration to optimize multi-destination routes, reducing travel time by 20%.
- **Music Genre Detection (MATLAB, Machine Learning)** — Built and optimized a machine learning model for music genre classification with 85% accuracy.
- **Brain Hemorrhage Detection on Head CT (Python, YOLOv8, Streamlit)** — Built a YOLOv8 pipeline and interactive Streamlit app to localize five brain hemorrhage subtypes on CT scans, achieving a 0.550 mAP@0.5 on a challenging 5-class imbalanced medical dataset.
- **Plant Disease Detection (Python, TensorFlow, Flutter)** — Developed a deep learning model for 15-class plant disease classification with 96.87% accuracy, deployed as a TFLite Flutter mobile app.
